Margarines and Oils
FOREWORD & INTRODUCTION

As manufacturer, we specialize in the production of all margarines for kitchen, table and biscuits, oils and fats. The company was founded in 1934 and launched the OLMA brand, which is still one of our flagship brands to date! 60% Of our production is exported. Mainly to France, the Netherlands, Germany, Spain, Italy, Austria, Eastern Europe and other parts of the world.

We pursue high-quality products, a policy of continuous investments in state of the art material, above-average focus on the services to the customer base: these are the foundations of our highly regarded business image. In March 2007 we were awarded the BRC – certificate, Grade A. In addition, all of our products are non-hydro, low in trans-fat and 100 percent vegetable. This is part of our quality approach, and once again stresses our intention to offer you high quality products.

The packaging machinery meets all needs: different volumes, different paper types, white label or private label etc. In summary, a standard customized product assortment for every customer.

The vehicle fleet consists of refrigerated trucks, ensuring our customers products that are delivered at exactly the right temperature. Thanks to our structured logistics system, we can delivery anywhere in: Belgium, Luxembourg, France, Germany, the Netherlands, Spain and Italy. It goes without saying that we also supply the rest of the world via our close contacts with international transport companies or via cargo transport.

Our company does everything in its power to limit its greenhouse gas emissions. On the initiative of owner and managing director Philippe Thiry, our factory invested in a thermal power plant with renewable energy. By producing our own energy and heat, we, as manufacturers, are at the forefront of a responsible business. Therefore, we use the ‘Green Energy’ logo which is displayed on most products. The perfect solution that cares about the preservation of the environment, while at the same time, wants to provide in its own energy needs.

Article 3442
Pallet 60 Cartons Bag – in – 15-liter box
Price: on request €/100 L
Price: on request €/L
This product can be ordered both under:
private label and under customer details
This oil can be strongly heated for a prolonged period of time,
± 180 °C

Additional information:
Groundnut oil or peanut oil is a vegetable oil extracted from peanuts.
Groundnut oil contains a high percentage of monounsaturated fatty
acids, and a relatively low percentage of polyunsaturated fatty acids.
Because of this, groundnut oil is considered one of the best oil types
with regard to long-term heating.
The oil is a very clear, light-colored oil with somewhat of a peanut
scent, which can be heated strongly.
You can use the groundnut oil in dressings, in marinades and
mayonnaise and you can use it for cooking, frying and deep-frying.
The oil is also perfectly suitable for stir-frying.
Do not store this oil in the refrigerator, since it crystallizes at
temperatures below 10°C.

In pizzas, palm fat is used in the dough, creating an open crumb texture.
PALMFLAKES CARTONS 10 KILOS

Article 8806
Pallet 50 Cartons
Weight 500 kg per pallet
Price: on request €/100 kg

Additional information:
Palm flakes is a completely new development of which we are proud. Previously, we could only offer the 10-kilo blocks. Flakes are easy to use instead of blocks. The palm flakes are our answer to the market demand and wishes. With blocks, part of the block had to be melted or cut off. The flakes allow for easy dosing and are used in the production of: Sauces, brioche-like breads, croquettes, etc... In pizzas, palm fat is used in the dough, creating an open crumb texture. Palm fat is also extremely suitable for deep-frying. The flakes consist of refined palm fat combined with stearin, a derivative of palm oil of a higher fraction. We do not use hydrogenated fats, and the product contains no trans fats.

PACKAGING

We can offer the following unique packaging;
500 g, 1 kg, 2.5 kg, 10 kg, 20 kg.
In addition, we have a complete range of oils and frying oil in 15 liter, with the “Bag in Box” system.
Based on years of market experience, this is the most common packaging.
For special applications or quantities, we can always discuss what packaging would be the perfect solution.

We can also supply the margarine and palm fat blocks on pallets. We use a special packaging technique for this, for which boxes are no longer required. The advantage is that one doesn’t have to open cartons, meaning that the margarine & palm fat can be processed quickly.
We have them in full blocks of 10 kg, but we can also supply them in precut 10 x 1 blocks.
You can easily process the blocks with less waste.
